Applicant		
Nokia Corporation et	al	
This report is the international pr Authority under Article 35 and to	eliminary examination report, established by ransmitted to the applicant according to Artic	this International Preliminary Examining ele 36.
2. This REPORT consists of a total		
This report is also accompanied by		
a. (sent to the applican	at and to the International Bureau) a total of	sheets, as follows:
sheets of the	description claims and/or drawings which h	ave been amended and are the basis of this report
and/or sheets	s containing rectifications authorized by this	Authority (see Rule 70.16 and Section 607 of the
cheets which	ive Instructions). In supersede earlier sheets, but which this Aut	hority considers contain an amendment that goes
beyond the o	disclosure in the international application as t	iled, as indicated in item 4 of Box No. I and the
Supplements		
b. (sent to the Internati	ional Bureau only) a total of (indicate type ar	nd number of electronic carrier(s))
	, containing a sequence listi	ing and/or tables related thereto, in computer ag to Sequence Listing (see Section 802 of the
readable form only, Administrative Instr	as indicated in the Supplemental Box Relationary.	ig to sequence bising (see Section 652 of 115
4. This report contains indications	relating to the following items:	
	of the report	
Box No. II Priori	ty	
Box No. III Non-e	establishment of opinion with regard to novel	ty, inventive step and industrial applicability
	of unity of invention	·
Box No. V Reaso	oned statement under Article 35(2) with regar	d to novelty, inventive step or industrial
	ability; citations and explanations supporting in documents cited	such statement
	in defects in the international application	
	in observations on the international application	on
Box No. VIII Colum	in observations on the international approximation

Box	No. I	Bas	sis of the report
1.	otherw	ise indic	the language, this report is based on the international application in the language in which it was filed, unless atted under this item.
		This rep which is	oort is based on a translation from the original language into the following language, sthe language of a translation furnished for the purposes of:
			international search (under Rules 12.3 and 23.1(b))
		Ħ	publication of the international application (under Rule 12.4)
		同	international preliminary examination (under Rules 55.2 and/or 55.3)
2.	furnish	ied to the re not an	o the elements of the international application, this report is based on (replacement sheets which have been the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" international to this report):
	\boxtimes	the int	ernational application as originally filed/furnished
		the des	scription:
		pages	as originally filed/furnished
		pages*	1 Lead in Authority on
		pages*	
		the cla	as originally filed/furnished
		pages	12 (together with any statement) under Article 19
		pages'	Livelia Authority on
		pages'	1 11 this A subsaction on
		•	awings:
		pages	as originally filed/furnished
		pages	received by this Authority on
		pages	
		a sequ	nence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3.		The a	mendments have resulted in the cancellation of:
			the description, pages
			the claims, Nos.
			the drawings, sheets/figs
		同	the sequence listing (specify):
			any table(s) related to the sequence listing (specify):
4.		This made 70.2(report has been established as if (some of) the amendments annexed to this report and listed below had not been since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule c)).
1			the description, pages
ŀ			the claims, Nos.
			the drawings, sheets/figs
l			the sequence listing (specify):
			any table(s) related to the sequence listing (specify):
*	If ites	n 4 appi	lies, some or all of those sheets may be marked "superseded."

Form PCT/IPEA/409 (Box No. I) (January 2004)

International application No.

PCT/FI 2003/000402

This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested: copy of the earlier application whose priority has been claimed (Rule 66.7(a)). translation of the earlier application whose priority has been claimed (Rule 66.7(b)). This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date. Additional observations, if necessary: The priority is considered valid.
translation of the earlier application whose priority has been claimed (Rule 66.7(b)). This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date. Additional observations, if necessary:

Industria	l applicability (IA)	Claims Claims	1-30	YES NO

2. Citations and explanations (Rule 70.7)

The claimed invention relates to a method for positioning a misplaced mobile terminal within a finite local area. A short-range wireless connection carries a functional instruction that actuates sound or light signals at the missing mobile terminal, which makes it possible to find it.

Documents cited in the International Search Report:

D1: US 5673023 A D2: WO 0032002 A1

Document D1, considered as the closest prior art document, reveals a positioning system for mobile terminals (col.6 lines 22-26), among other things. An executable function is detectable by senses, (audible signal=sound pattern, strobe light=flash pattern). A signal activates the function, which is hardwired in the mobile terminal and the function to be activated (sound or flash pattern) is activated as a response.

D2 reveals a system where mobile stations have proximity detectors which recognize proximity signals transmitted by a proximity system, (abstract). The proximity system may be based on Bluetooth technology, (p.9 line 28-p.10 line 20).

The function in the claimed invention is determined and then transmitted by the transmitter, and activated at the receiver as a response to the reception of the functional instruction. There are no predetermined functions in the receiver, only a processing unit to execute the received functional instruction. The sender defines a function to be transmitted to the receiver, where the function is activated.

To determine a function to be transmitted, and then activated at a receiver is not revealed by the cited documents. Accordingly the claimed invention fulfils the requirements of novelty, inventive step and industrial applicability.
